

**Radial Distribution Function $g^{000}(r)$ Across Density Regimes $\rho^* \in [0.15, 0.80]$
Patey, Levesque & Weis (1979) vs. Integral Equation Closures**

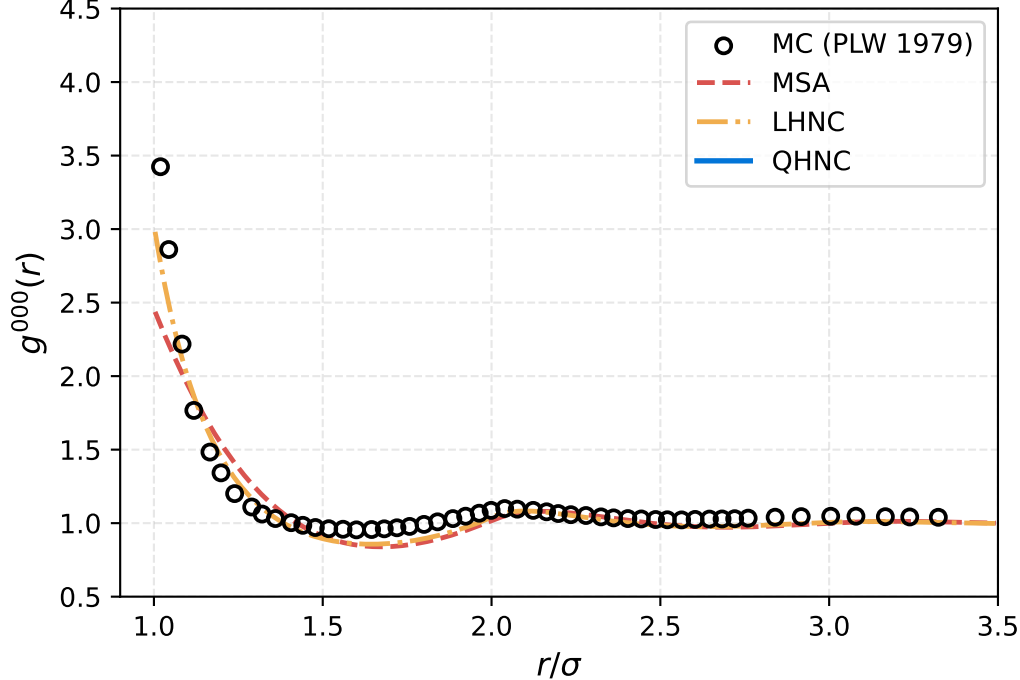

Panel (a): $\rho^* = 0.15, \mu^{*2} = 2.0$ (PLW Fig. 1)

Panel (b): $\rho^* = 0.4, \mu^{*2} = 2.75$ (PLW Fig. 2)

Panel (c): $\rho^* = 0.6, \mu^{*2} = 2.75$ (PLW Fig. 3)

Panel (d): $\rho^* = 0.8, \mu^{*2} = 2.75$ (PLW Fig. 4)
